Project Case | Wuxu Sewage Treatment Plant, Shiling Town, Suqian, Jiangsu

Project Overview

Located in Shiling Town, Suqian City, Jiangsu Province, Wuxu Sewage Treatment Plant focuses on centralized collection and standardized treatment of township domestic sewage. The project effectively curbs regional water pollution and greatly optimizes the local water ecological environment.

Project Solution

#PROBEST supplied professional intelligent water quality monitoring equipment for this project, realizing full-process, real-time and precise monitoring of core water quality indicators in every sewage treatment section, supporting stable plant operation and qualified effluent discharge.

Applied Monitoring Products

- PAS-305A Water Quality Automatic Sampler
- PCM300-CODcr COD Online Automatic Monitor
- PCM300-NH3N Ammonia Nitrogen Online Automatic Monitor
- PCM300-TN Total Nitrogen Online Automatic Monitor
- PCM300-TP Total Phosphorus Online Automatic Monitor
